Held techno-functional product and consulting roles across blockchain, real estate, engineering, and government sectors. A proactive self-starter always interested in learning new ideas and concepts to drive innovation.

Work Experience

The Software Practice

Singapore

Consultant - Project Lead

Nov 2022 – Current

- Oversaw the end-to-end delivery of bespoke software development projects up to S\$10M in value
- Collaborated with senior client stakeholders up to director level on strategic decisions, offering guidance on timeline and feature prioritizations to maximize business impact
- Led pre-sales efforts for potential product features, from drafting of proposed solutions and proof of concepts to liaising with the technical team for effort estimation and quotations
- Managed remote cross-functional teams of up to 20 across design, QA, BA and development functions
- Oversaw system integrations with the Singapore Government Tech Stack (SGTS), including Singpass/Corppass, MyInfoBusiness, WOGAA, and WOG ADFS

Crypto.com

Singapore

Project Manager / Business Analyst

Mar 2022 – Jun 2022

- Collaborated with the Head of Blockchain Security to define the product roadmap, milestones, and requirements for the Crypto.com Institutional Custody Product
- Led the feature launch of WalletConnect integration on web and mobile apps, enabling initial access to 10+ DeFi protocols, by working with a team of 8 members across design and development functions
- Independently conducted competitor analysis to identify opportunities within the Crypto Wallet/Custody landscape, providing insights that informed management's strategic positioning

SimplifyNext

Singapore

Asst. Manager (Apr 21-Jan 22); Consultant (Jan 20-Mar 21), Analyst (Oct 18-Dec 19)

Oct 2018 – Jan 2022

- Joined as the 8th employee; Drove business operations that led to company growth of 70+ headcount in 3 years
- Led cross-functional teams of 4-5 members to deliver 13 automation projects for six different clients; Each project led to >200 hrs/month in full-time equivalent (FTE) savings
- Designed and developed software automation and visualization solutions using UiPath, Power BI, SQL Server and APIs; Conducted User Acceptance Testing and Knowledge Transfer sessions with 100+ business users
